GRAPHITE ONE RESOURCES INC.

Notes to the Condensed Interim Consolidated Financial Statements

March 31, 2018

(unaudited)

(Expressed in Canadian dollars)

1. NATURE OF OPERATIONS

Graphite One Resources Inc. (“Graphite One” or the “Company”) was incorporated in Alberta and commenced operations on March 16, 2006 under the name Cedar Mountain Exploration Inc. (“Cedar Mountain”). On March 23, 2012, Cedar Mountain changed its name to Graphite One and adopted the symbol GPH on the TSX-V effective March 27, 2012. The Company was continued into British Columbia on September 12, 2014. Graphite One is the parent company of its consolidated group.

Graphite One is engaged in the business of acquiring exploring and evaluating graphitic material properties. Through its 100% owned subsidiary, Graphite One (Alaska) Inc., the Company is focussed on the Graphite Creek property near Nome, Alaska, (the “Graphite Creek Project”).

The ability of the Company to proceed with the evaluation and development of the Graphite Creek Project depends on a number of factors, the key ones including obtaining the necessary financing to complete the evaluation and development, and ultimately upon future profitable production or proceeds from disposition of the Graphite Creek Project.

2. GOING CONCERN

These unaudited condensed interim consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period.

As at March 31, 2018, the Company had a cash balance of \$35,668 and working capital deficit of \$548,835 with current liabilities of \$651,370. The Company has incurred losses since inception and does not generate any cash inflows from operations. In the three month period ended March 31, 2018, cash used in operating activities totalled \$165,591.

The Company’s ability to continue to meet its obligations and carry out its planned exploration and development activities is uncertain and dependent upon the continued financial support of its shareholders and on securing additional financing. There is, however, no assurance that any such initiatives will be sufficient and, as a result, there is significant doubt regarding the going concern assumption and, accordingly, the ultimate appropriateness of the use of accounting principles applicable to a going concern. These consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary if the Company were unable to realize its assets and settle its liabilities as a going concern in the normal course of operations for the foreseeable future. These adjustments could be material.

GRAPHITE ONE RESOURCES INC.

Notes to the Condensed Interim Consolidated Financial Statements

(unaudited)

(Expressed in Canadian dollars)

3. BASIS OF PRESENTATION

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and applicable to interim financial reports, including International Accounting Standard 34 (“Interim Financial Reporting”). These financial statements should be read in conjunction with the annual financial statements for the year ended December 31, 2017, which have been prepared in accordance with IFRS as issued by IASB. The accounting policies applied in the preparation of these financial statements are consistent with those applied and disclosed in the Company’s consolidated financial statements for the year ended December 31, 2017.

The unaudited condensed interim consolidated financial statements have been authorized for issue by the Board of Directors of the Company on May 28, 2018.

These unaudited condensed interim consolidated financial statements have been prepared on a historical cost basis. The statements are presented in Canadian dollars unless otherwise noted.

3.2 Significant judgments, estimates and assumptions

The preparation of the Company’s unaudited condensed interim consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the unaudited condensed interim consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continually evaluated and are based on management’s experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results could differ from these estimates.

Judgments

Exploration and evaluation property: The Company is required to make significant judgments on the ongoing feasibility of mineral exploration, and whether there are indicators that the right to explore the specific area has or will expire, that further exploration and evaluation plans have changed, or whether development of a specific area is unlikely to recover existing exploration and evaluation property costs. If any of these indicators are present, management would need to assess whether the exploration and evaluation property should be impaired.

Estimates and assumptions:

Share-based payments: Share-based payments are determined using the Black-Scholes Option Pricing Model based on estimated fair values of all share-based awards at the date of grant. The Black-Scholes Option Pricing Model utilizes subjective assumptions such as expected price volatility and expected life of the option. Changes in these input assumptions can significantly affect the fair value estimate.

4. SIGNIFICANT ACCOUNTING POLICIES

Refer to the Company's annual audited consolidated financial statements for the years ended December 31, 2017 and 2016 for a summary of significant accounting policies.

4.1 Changes in Accounting Standards

The Company has reviewed the new and revised accounting pronouncements issued by the IASB relevant to the year ended December 31, 2017 and subsequently, and none were considered to have a significant impact on the Company's current operations or financial statements.

(Expressed in Canadian dollars)

6. EXPLORATION AND EVALUATION PROPERTY (cont'd)...

In May 2015, the Company executed a long-term lease agreement with Kougarok LLC, commencing effective January 1, 2014 with an initial term of twenty years, and with provisions to extend the lease for two successive twenty year periods and ultimately for as long as production continues from the property. An advance royalty in the amount of US\$30,000 was paid upon execution of the agreement, with annual payments of US\$30,000 due each year until January 2019, and then increasing by US\$10,000 each year until production commences. All required payments under the agreement have been made. The production royalties are to be calculated as follows: 5% from lands in 4 claims that were originally located in 1943, 2.5% from lands within 20 other claims, 5% from lands within state claims staked by the Company within the area of interest and 2.5% from state claims acquired by the Company within the area of interest. All advance royalties paid may be recouped from production royalties. The Company has the option to reduce the production royalties by up to 2% by paying US\$2 million for each 1% reduction of the Graphite Creek Royalty.

On January 24, 2012, the Company purchased from a private individual (the "Seller") the GC Purchased Property for \$20,000 and a 2% production royalty on future production from the GC Purchased Property. The Company had the right to purchase the production royalty for \$1 million until January 24, 2015 (the "Royalty Purchase Option"). The Company and the Seller entered into an extension agreement effective January 24, 2015 (the "2015 Extension Agreement") whereby the Royalty Purchase Option could have been exercised at any time on or before the earlier of (i) January 24, 2017, or (ii) the date that is six (6) months after the release by the Company of a feasibility study on the Graphite Creek Property. In connection with the 2015 Extension Agreement, the Company issued to the Seller 769,231 common shares of the Company at an issue price of \$0.13 per share. In January 2017, the Company and the Seller agreed to further extend the terms of the Royalty Purchase Option and entered into an extension agreement effective January 24, 2017 (the "2017 Extension Agreement") whereby the Royalty Purchase Option may be exercised at any time on or before January 24, 2021. In connection with the 2017 Extension Agreement, the Company issued to the Seller 1,666,667 common shares of the Company at an issue price of \$0.09 per share and 1,153,846 common share purchase warrants of the Company.

During June 2015, the Company purchased from another private individual the balance of the GC Purchased Property (28 Alaska state mining claims covering the same lands as the 28 Alaska state mining claims acquired in January 2012) for US\$50,000, the issuance of 3 million common shares of the Company at a fair value of \$270,000 and a royalty interest equal to 1% of the Net Smelter Returns received by the Company on production from the claims. The Company has the right to purchase the royalty for US\$500,000 at any time within 36 months following the start of mine production.

7. SHARE CAPITAL

7.1 Authorized

Unlimited number of common shares with no par value.

7.2 Shares Issued

The following share transactions occurred during the year ended December 31, 2017:

In February 2017, the Company issued 1,666,667 common shares at a fair value of \$150,000, and 1,153,846 share purchase warrants at a fair value of \$54,692, both in connection with an agreement to extend the Company's right to purchase a net smelter return royalty. The Company incurred share issuance costs of \$1,622.

On August 22, 2017, the Company completed a private placement for total gross proceeds of \$678,800. Pursuant to this private placement, the Company issued a total of 9,697,143 units (the "2017-1 Units") at a price of C\$0.07 per 2017-1 Unit. Each 2017-1 Unit consists of one common share and one transferable common share purchase warrant (a "2017-1 Warrant"). Each 2017-1 Warrant entitles the holder to purchase one additional common share of the Company at a purchase price of \$0.12 per share during the 60 months from the date of issuance. Based on the residual valuation method, no value was attributed to the 2017-1 Warrants. The Company incurred share issuance costs of \$14,081.

On December 4, 2017, the Company completed a private placement for total gross proceeds of \$707,202. Pursuant to this private placement, the Company issued a total of 14,143,709 units (the "2017-2 Units") at a price of C\$0.05 per 2017-2 Unit. Each 2017-2 Unit consists of one common share and one transferable common share purchase warrant (a "2017-2 Warrant"). Each 2017-2 Warrant entitles the holder to purchase one additional common share of the Company at a purchase price of \$0.10 per share during the 60 months from the date of issuance. Based on the residual valuation method, no value was attributed to the 2017-2 Warrants. The Company incurred share issuance costs of \$6,367.

The following share transactions occurred subsequent to March 31, 2018:

On May 25, 2018, the Company completed a private placement for total gross proceeds of \$2,143,050. Pursuant to this private placement, the Company issued a total of 30,615,003 units (the "2018-1 Units") at a price of C\$0.07 per 2018-1 Unit. Each 2018-1 Unit consists of one common share and one transferable common share purchase warrant (a "2018-1 Warrant"). Each 2018-1 Warrant entitles the holder to purchase one additional common share of the Company at a purchase price of \$0.12 per share during the 60 months from the date of issuance. Based on the residual valuation method, no value was attributed to the 2018-1 Warrants. The Company paid finder's fees in the amount of \$13,104 and issued 187,200 transferrable warrants, each such warrant entitling the holder to acquire one additional common share of the Company at the same price as the 2018-1 Warrants described above.

7. SHARE CAPITAL (cont`d...)

7.3 Share based compensation

Pursuant to a stock option plan (the “Plan”) for directors, officers, employees and consultants, the Company may reserve a maximum of 10% of the issued and outstanding listed common shares, and the exercise price to be determined on the date of issuance of the options. The options are non-transferable and will expire, if not exercised, 90 days following the date the optionee ceases to be a director, officer, employee or consultant of the Company for reasons other than death, one year after the death of an optionee or on the fifth anniversary of the date the option was granted. Options granted under the plan may not exceed five years and vest at terms to be determined by the board of directors at the time of the grant, but shall not be less than the price determined by policy or policies of the stock exchange(s) on which the Company’s common shares are then listed, or \$0.05 per share. Occasionally, the Company issues stock options to agents which do not fall under the plan.

The following table summarizes activity related to stock options:

	Options	Weighted Average Exercise Price
Balance, December 31, 2016	23,925,000	\$ 0.12

9. MANAGEMENT OF CAPITAL

The Company defines capital that it manages as equity.

The Company's objective when managing capital is to maintain corporate and administrative functions necessary to support the Company's operations and corporate functions; to perform mineral exploration activities on the Company's exploration projects; and to seek out and acquire new projects of merit.

The Company manages its capital structure in a manner that provides sufficient funding for operational and capital expenditure activities. Funds are secured, when necessary, through debt funding or equity capital raised by means of private placements. There can be no assurances that the Company will be able to obtain debt or equity capital in the future.

The Company does not pay dividends and has no long-term debt or bank credit facility. The Company is not subject to any externally imposed capital requirements. There have not been any changes to the Company's capital management policy during the period.

10. RISK MANAGEMENT

10.1 Financial Risk Management

The Company may be exposed to risks of varying degrees of significance which could affect its ability to achieve its strategic objectives. The main objectives of the Company's risk management processes are to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. The principal risks to which the Company is exposed are described below.

a. Credit risk

Credit risk is the risk of potential loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash.

The Company has assessed its exposure to credit risk on its cash and has determined that such risk is minimal. The majority of the Company's cash is held with reputable financial institutions in Canada.

b. Liquidity risk

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they fall due. As at March 31, 2018, the Company had a working capital deficit of \$548,835, and it does not have any long term monetary liabilities. The Company may seek additional financing through debt or equity offerings, but there can be no assurance that such financing will be available on terms acceptable to the Company or at all. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. The Company's financial liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms.

c. Interest rate risk

Interest rate risk is the risk arising from the effect of changes in prevailing interest rates on the Company's financial instruments.

The Company had \$35,668 in cash at March 31, 2018 on which it earns variable rates of interest, and may therefore be subject to a certain amount of risk, though this risk is considered by management to be immaterial.

10. RISK MANAGEMENT (cont'd...)

d. Foreign currency risk

Foreign currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company maintains the majority of its cash reserves in Canadian dollars. A portion of the Company's funds are held in US dollars and are therefore subject to fluctuations in foreign exchange rates.

At March 31, 2018, the Company has certain monetary items denominated in United States dollars. Based on these net exposures, a 10% appreciation or depreciation of the Canadian dollar against the United States dollar would result in an increase or decrease of \$7,900 in the Company's net loss.

10.2 Fair Values

The carrying values of cash, refundable deposits and other receivables and trade and other accounts payable approximate fair values due to their short-term to maturity nature or the ability to readily convert to cash.
