About Graphite Creek

The Graphite Creek Property comprises 129 claims totaling 6,799 hectares on the Seward Peninsula of Alaska, 65 kilometers north (40 miles) of a deep sea port at Nome.

Mineralization at the Graphite Creek Property is characterized by coarse crystalline (large flake) graphite (greater than 80mesh) within graphite-bearing schist(s). Please refer to the January 20, 2014 press release where Graphite One reports a NI 43-101 inferred resource of 284.71 million tonnes at 4.5% graphite (including 37.68 million tonnes at 9.2% graphite and 8.63 million tonnes at 12.8% graphite).

About Graphite One Resources Inc.

GRAPHITE ONE RESOURCES INC. (GPH: TSX-V; GPHOF: OTCQX) is exploring with the intent to develop the Graphite Creek Project, USA’s only advanced staged large-scale, large flake graphite deposit.

About Fundamental Research

Since 2003, Fundamental Research Corp has been providing the highest institutional quality equity research coverage on small and micro-cap companies through their extensive distribution network. In 2009, they also started issuing reports on exempt market securities. In 2010, their Top Picks earned them the #3 highest ranked analyst firm with a return of 20.75%, and #1 in the Basic Materials Sector (which includes mining) with a return of 29.07% on third party ranking systems that tracks analysts globally. Their goal from the beginning was to provide high quality research to a broad audience, while adhering to high ethical standards and a strong foundation of integrity.

ON BEHALF OF THE BOARD OF DIRECTORS

"Anthony Huston" (*signed*)

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

This release includes certain statements that may be deemed to be forward-looking statements. All statements in this release, other than statements of historical facts that address access to capital, regulatory approvals, exploration drilling, exploitation activities and events or developments that the Company expects, are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, continuity of mineralization, uncertainties related to the ability to obtain necessary permits, licenses and title and delays due to third party opposition, changes in government policies regarding mining and natural resource exploration and exploitation, and continued availability of capital and financing, and general economic, market or business conditions. Readers are cautioned not to place undue reliance on this forward-looking information, which is given as of the date it is expressed in this press release, and the Company undertakes no obligation to update publicly or revise any forward-looking information, except as required by applicable securities laws. For more information on the Company, investors should review the Company's continuous disclosure filings that are available at www.sedar.com.

*The mineral resource estimates reported in this press release were prepared in accordance with Canadian National Instrument 43-101 Standards of Disclosure for Mineral Projects ("**NI 43-101**"), as required by Canadian securities regulatory authorities. For United States reporting purposes, the United States Securities and Exchange Commission ("**SEC**") applies different standards in the classification of mineralization. In particular, while the terms "measured," "indicated" and "inferred" mineral resources are required pursuant to NI 43-101, the SEC does not recognize such terms. Canadian standards differ significantly from the requirements of the SEC. Investors are cautioned not to assume that any part or all of the mineral deposits in these categories constitute or will ever be converted into reserves. In addition, "inferred" mineral resources have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian securities laws, issuers must not make any disclosure of results of an economic analysis that includes inferred mineral resources, except in rare cases.*
